hwoer! We thought we had a rough time getting CVG on the streets lest month, but this legus has been aven mora difficult!

I mean, call me emoning grt, but what with "British Rail regrats that due to inclament weather...", end "London Underground regrats that due to a security alari...", not to mantion stolan cameres end printer brankdowns, this has been one muthe of e month. And just when I think it can't get eny worse, Jon draws a cartoon that makes me look lika Plug from The Bash Straet Kids. Don't ba mislad, et you attractive lady readers - I'm deed rice looking, I sm. end Jon's just jealous.

Anyway, to complicate things turther, we decided wa had to make a few tweaks to our new dasign to make that mag even better looking end provide even more informetion for our beloved randers!

Aha, now I come to mention providing more, you may also be pleased to heer that from next month's issue, CVG will have an extra 16 editorial pagas every month, so we can lit in more huge reviews, a biggar Cheat Mode section (get sending in those meps!) and larger news, previews and Meilbeg sections.

And how much extra is ell this going to cost you?

Nought, no, not a lot. Zilch, that's the big D. Not a sausage, not a jot, not the tiniest spot. Nothing whatsoevar et ell. Dum dum dum, na-na na-na na-na-na-na-na-na-na-na (nowt teken out!)...

THE POWER OF AKIRA

Look. Forget Thunder... Thunder... Thundercate. Peul Giancey checks out the best SF cartoon ever end braces himself for the game of the film...

If you thought the printeds of Japaness science fiction movies we Godzilda versus The Smog Monster, think again. Akira is over two hours of the best animated omena ever, based on the cyber punk graphic novel by Kaisuhiro Otomo, who also directed the movie.

The Akire comic books have been an sale in the UK for a couple of years, and the movie has played to vest crowds at the occasional animation feelshal, but from fallar Fabricary it is greatly for four its allected chemae throughout the country. Not surprisingly, the speech in the filth is animaly Japanese.

but fortunately the version currently on islease has subtilize to the story is eat in Neo Tokyo in 2019, when the world is to covering from World War III, and II centres on the eventures of two members of a motercycle gang who regularly do batita with rival bitars in I he gill gaireds.

During an incredible motorbike chaen, one of the gang, Taisuc, is injured and promptly fand mysierously all lifted to an army hospital where he becomes the subject of medical experments, resulting in him being given awesome telekinetic abiilius. The power of Akits.

Unfortunately, Tataud lan't a well batanced lad, and the fact that he head't bean messed with doesn't half lock him off in fact, he uses his new found powers to dealiny most of Nac Tokyo, and neither fears, tanks, mor even an orbital defence cannon one slow him down.

Saving the city is down to his childhood buddy and motorbiking male. Kaneda (who, Incidentally, rides the hottest motorcycle in the universe), and three children who also have the grit of Akta.

Though Akira has been awarded a 12 certificate, it's quite a violous and bloody lim, and following like story often lakes some affort. However the supersitive animalion areas his show, and it makes the action scenes a real shrill to watch. Any SF fan lucky anough to live near one of the chemes listed, dainitally won't regist going to see.

STAR TURNS

main way fo gat points is by hitting your start (they're alwhiting your start (they're always the ones in the opposifion's half). Hit each star for two points. The extra points are given if you light up alfine! Hit your opponent's start to turn them off and deduct the points from his score! Remamber, Speedballers, those extra points can make all the difference!

BONUS BOINGERS

The other method of scoring points is to use the bonus beingers which are localed outside each penalty area in the centre of the pitch. When fire bed is thrown low at one of these it will bounce off at high speed and two points should be added to your secured if your player is correct.

The lotally skill Speedball 2 hills the top, and deservedly so! Apart from that, what's all this budget rubbish doing here? AlterBarner and OutRun? Plant And where have the Turtles vanished to?

ROB'S TIP FOR THE TOP I'm goling to stick my neck on the line here, and say that Speedball 2 will keep its place, but that budget atuff could prove me wrong...

Lumme! Lolus drops from top to nowhere this month, with the topper F-19 soaring back to number one. Again, loads of very average budget gear in the bhart- I'm aurorised Speedball 2 isn't higher than it

ROB'S TIP FOR THE TOP There's a good chance that the Blimap's super fu-ture sport will be at the top next month, but watch out for the brill Team Suzuki.

At long last those drafted Turtles are knocked off their perch, with the totally fabbo Super Mario II taking up the reins, and the excellent Legend of Zelda lesping from nowhere to second. But what happend to Double Dragon II, eh, puniers? ▲ C64 Outrun excitement at number 11.

Racing sequels are in abundance on the ST this month. but fighter locks and arcade freaks get a look in, too...

HARD DRIVIN' II: DRIVE HARDER DOMARK £24.99

After the success of the ongmal, Domark have now added a two player "race your mala" link-cable option, and a track editor - not a bad idea, but somehow owners of Hard Drivin' would feel hard done by if they went out and paid £25 for this, A race idea, but a little overanced in our employ

OVERALL

TEST DRIVE II: THE DUFT ACCOLADE

After a considerable wait, Test Drive It screeches on to the ST - pil-

ting the world's two fastest production cars (the Fairan F40 and the Porsche 959) against each other. Not a bad racer, by any means, but if you want the best you'd be better all going for Lotus Espail Challenge.

BY DYNAMIX

A fee having fully explored the potential of simulating the latest in lighter aircraft technology, several software companies seem to be going back in line to give computer owners the chance to take part in First World Wall doglights Dynamar's Red Barron joins the fivy close on the tat of Microprose's Knights of the Sky and Mithdoscop's Burn All States.

Of course, in those days, steying in the air was much more of a test of the pilot's skill - there were no jamming devices to hide behind and no sell guiding weapons to destroy an opponent over the horizon. Nope, it was all down to the man and his format if motinated machine our down to the man and his format if motinated machine our manufactures.

elm tan as Paul, and I'va hed trouble getting him off Red Baron tong arough to actuelly play it mysalt. Mind you, I can see what ha'e raving about, because the phylous attention to detail makes this one of the most

reallello-tealing air combat elmulatore I've avar played. How's this for considerate? As wall so being able to set the level of graphic detail to auit the speed of the machine, you can also get the machina to automatically ewlich off some of the ground to eight planes doing battle, the action hardly clows. The dapiction of the planes is just outstanding, and the counds the game produces through an AOLIB card are extremely true to lite, providing an extre edge to the excitement. Just as realistic to the wey the other pliots lly, and Red Baron le the first game of its type to really make mc (and I know thie counds waird) scared whenever one of them gate on my tall and I hear the sound of machine guns. My one eligh regret ie that, unlike Knighta of the Sky, Red Baron doesn't have the tacility to link two PCs and ily head-to-heed, but there'e mora than anough action for any flight sim tan hera, and mora than anough reason for me to save up for a good, tast PC

This is one of the most involved 3D gamee I've ever seen - It reminds me of the classic Mercenery only with the grephics end the etmosphere brought bang up to date. The ditterent-eized rooms end the veet eesortment of drolds are enough to keep the plever constently

grephics are very fest-moving, and the combre blue back grounds make the orange and green robots look almost tluorescenti it e just e cheme that there isn'i a bit more verlety in the robot designe - it tooks like the programmers diecovered e routine to produce vector grephic arcs and circles end decided not to use enything size. That eside, it's e greet game and once you've become engroesed in the 3D world It'll be hours before you dreg yourself ewey especially with the tense riveiry between you end the ibilietor to keep you busy.

MERCS

The latest in a long line of US Gold's Capcom convenions is Merca - the everydey story of one man (or two, if you've got a mate who is willing to play) egainst the might of e querilla empiral. The action is pretty straightforward. Simply

guide your commando around the eight-way scrolling backdrops, deeling out lead death to any one who dares to pass in Iront.of your quingith. The coin-op was quite novel in that it actually enabled you to blow awey sections of the scenery, like enemy huts and ell of this napalm exoltement has made its way into the commercial.

the scrolling looks fine and the programmers have even cropped the sides of the depile y to simulate the vertical screen format of the arcade game. Further to this, Tiertex have even included the colon-op's intro sequence in Its entry 18 but will all these leatures add up to a playable game? Well, you'll have to wait the next sease to find out

POPULOUS Not only have Tecmagik improved the

ollowing on trom their tirst Sega Mester System smash, Pac-Menia. Tecmedik are currently putting together e version of Populous for Sege's 8bit console. From what we've seen of the conversion it looks extremely promising with all the features of the 16-bit game cremmed in and then somel The programmers at Tecmagik have added to the original by putting not 5000 worlds in their conversion! That's a whole lot of conquering for you potential meglomaniecs out there! Technically speaking. Populous looks tike being one of the greetest Sege carts ever!

Not only have Tecmagik improved the original specification, but the game still plays as swiftly as the Amiga and Megadrive ver-
